## Skills:

HTML, CSS, JavaScript, React.js, Redux. Node.js, Canvas, MongoDB, Git, Figma, Photoshop

**English:** C1 - Advanced

## Work Experience:

**Skyeng** – English Teacher / Developer

2019 September – 2021 April

*Over the course of my career: I have conducted over 1500 lessons, became an [accent reduction instructor](#) and created several applications.*

### Projects:

[Words](#) – This application was designed to help students improve their spelling skills while playing a game and having fun.

[Quiz](#) – The title is pretty self-explanatory. If you like quizzes this app will be to your liking.

[IrregularVerbs](#) – Studying irregular verbs is hard for foreign students, but not only studying. It is also hard for teachers to find the right approach to teach them. So I was keeping this information in my mind before coming up with an idea of this app to help students study those words in an interesting and interactive way without any hustle.

[Spelling](#) – Ear training program designed to help you get accustomed to the sounds of American and British language.

[Conversation](#) – Conversational drills for teachers to get their students talking.

[Idioms](#) – A website for teachers to find advanced vocabulary for their lessons.

**Education:** I'm self-taught developer who completed over 30 Udemy courses.

**Hobbies:** In my free time I like exercising, reading books, learning languages and socializing.
